## FORWARD FORUM

### Rethinking Prosperity: Confronting the Inequality and Climate Crises

*Monday, January 15 2018, 5pm-7pm*

Standard economic indicators, such as GDP and growth, as well as standard macroeconomic models tell us very little about the two biggest challenges threatening the prosperity of human societies in the early 21<sup>st</sup> century: the inequality and ecological crises.

This first edition of the annual "Forward Forum" of the School of Management and Innovation of Sciences Po will bring together high-level experts and policy makers to highlight both the inequality and climate crises and the powerful ways in which they question our dominant models of prosperity. From Pope Francis to the World Bank, there is indeed growing recognition that social and environmental predicaments affect one another and must be addressed jointly to be successfully mitigated.

**Cornelia WOLL: Introduction**

**Branko MILANOVIĆ: "Global Inequalities"**

**Stéphane DION: "Negotiating Climate Change"**

**Éloi LAURENT: "Linking the inequality and ecological crises"**

**Marie-Laure SALLES-DJELIC: Moderator**

**Branko MILANOVIĆ**, Economist, Presidential fellow at City University of New York and Senior Scholar at the Luxembourg Income Study (LIS), formerly Lead Economist at the World Bank's Research Department, author most recently of *Global Inequality. A New Approach for the Age of Globalization* (2016), Recipient of the 2018 Leontief Prize for Advancing the Frontiers of Economic Thought

**Stéphane DION**, Diplomat, Canadian Ambassador to Germany and Special Envoy to the European Union, former Foreign Affairs Minister of Canada, former Environment Minister of Canada and as such President of the UN Climate Change Conference (COP 11) in Montreal in 2005.

**Éloi LAURENT**, Senior Research Fellow at OFCE, Professor in the School of Management and Innovation at Sciences Po and Visiting Professor at Stanford University, author of *Measuring Tomorrow: Accounting for Well-being, Resilience and Sustainability in the 21st century* (2017).

Moderated by **Marie-Laure SALLES-DJELIC**, Professor, CSO and Co-Dean of the School of Management and Innovation at Sciences Po.
